

Paediatric Ophthalmology

Examining a Child

Refractive Errors

Ocular Surface Disease

Neonatal Conjunctivitis

Allergic Eye Disease

Blepharitis etc.

Corneal Grafting in Children

Lacrimal System

Dacryocystocele, Nasolacrimal Duct Obstruction, Dacryocystitis

Childhood Cataract

Childhood Glaucoma

Retinoblastoma

Retinopathy of Prematurity and other causes of childhood retinal Detachment

Orbit: Preseptal/ Orbital Cellulitis

Abnormalities of the bony orbit (Craniofacial)

Childhood Tumors of the Orbit

Ptosis

Developmental Anomalies of the eye

Cryptophthalmia, Anophthalmia, Microphthalmia

Anterior Segment Dysgenesis

Aniridia

Axenfeld Rieger

Trabeculodysgenesis

Coloboma

Anomalous Optic Discs

Uveitis

Albinism

Phakomatoses

Inherited Retinal Disease

Retinal Dystrophies associated with other systemic disease & Lebers

Childhood Neuroophthalmology

Eye movement disorder

(CN Palsies, Dorsal Midbrain Syndrome, Nystagmus, Spasmus

Nutans, Opsoclonus, Ocular Motor Apraxia, INO)

Pupil Abnormalities

Childhood Optic Nerve conditions (congenital & Acquired)

Post Chiasmal Acquired Disease affecting vision

Structural Abnormalities of the brain associated with Vision / Eyes

Acquired brain disease and the visual system

Raised ICP in childhood

?Metabolic (Mucopolysaccharidoses, Neurometabolic, Cystinosis, Wilsons)

Abusive Head Trauma

Strabismus

Binocular vision, Fusion, Stereopsis etc. and the orthoptic exam

Amblyopia

Esotropias

Exotropias

Vertical Strabismus

Paralytic Strabismus

Dysinnervation disorders (Duane's etc)

Thyroid Eye disease and Strabismus

Strabismus Surgery
